Dear Occupier,

Ashton Green – Proposed Transport Improvements

Leicester City Council is proposing to carry out transport improvements to support the delivery of the first housing phase of the Ashton Green development.

The works required form part of the planning conditions of the 2014 outline planning permission and include; cycle/footway improvements, speed restrictions and traffic calming measures to Beaumont Leys Lane and Leicester Road. The proposed works will also enable access to the first parcel of residential development on Leicester Road and will include extending existing bus services.

This package of transport schemes follows the recent improvements to the Bennion Road cycleways and Beaumont Shopping Centre bus interchange. These are part of the wider programme of transport improvements in support of the Ashton Green development.

A summary of the proposals is included with this letter and detailed proposals are available online at <http://consultations.leicester.gov.uk> The Council would like to hear your views on these proposals and invites you to comment using the link above or using the attached form and reply envelope. A response to your comments is expected early in 2016.

If you require any further information regarding this consultation or the wider Ashton Green development project then please contact me by telephone or email.

Yours faithfully,

G H Mee BSc MRICS DMS
Ashton Green/SUE Development Manager
