Dear Occupier,

## SHANKLIN DRIVE – PROPOSED CENTRAL ISLANDS

Residents have raised concern about road dangers on Shanklin Drive and requested measures are taken to reduce the existing high vehicle speeds. A survey carried out on Shanklin Drive in July 2016 recorded the average speed of vehicles as 33mph and the 85<sup>th</sup> percentile speed (*the speed at or below which 85% of all vehicles are observed to travel*) as 39mph.

The concerns have been discussed with your local Ward Councillors and it is proposal to install islands in the centre of Shanklin Drive. These islands will visually and physically narrow the road and should prevent drivers from increasing speed. In total seven central islands have been proposed and the attached plan shows the locations.

I would be grateful for your opinion so please complete the attached form (it can also be completed on-line at <http://consultations.leicester.gov.uk/>) and return it in the enclosed pre-paid envelope before the 20<sup>th</sup> July 2018. The responses will be summarised and presented in a report which will make recommendations about if and how a scheme should proceed.

If you have any questions or require further information please contact me, or if you prefer your local Ward Councillors can be contacted as follows:
